

## **intuVision Analytics Now Embedded in Axis Cameras**

---

Transform your current Axis camera system to automatically detect removal of monitored objects with intuVision's *Object Taken Spy*. Human operators can get tired, or attention can wander, but your valuable assets or expensive display items will be secure when protected by *Object Taken Spy*.

Easily configured using the intuitive camera application interface and run entirely on Axis cameras, *Object Taken Spy* will efficiently monitor areas around selected assets in camera views. Easily viewable text alerts and audible alarms are triggered when a monitored object is taken from the specified area, instantly reacting to robberies that might have been missed.

Protect your valuable assets for a low cost and be secure in the knowledge that intuVision's *Object Taken Spy* will be on guard!

The *Object Taken Spy* is the first of many Panoptes "event spies" to be available embedded in AXIS cameras. For more information on this or on our other products, including free trials of our complete video analytics solutions, please visit our website at [www.intuvisiotech.com](http://www.intuvisiotech.com) or call us at 781-497-1015.

**Let intuVision's *Object Taken Spy* guard your valuables for you.**
