

The intuVision Team WOWs at the IEEE AVSS 2010 Conference

Boston, MA – intuVision was a proud sponsor and Gold Partner of IEEE'S 7th International Conference on Advanced Video and Signal-Based Surveillance. The four day conference, from 29th August –to– 1st September 2010, was a forum for security, safety and monitoring in smart environments where intuVision grabbed the attention of conference attendees with live and onsite demonstrations of its cutting edge, streamlined video detection and analytics solutions.

An onsite camera overlooking an activity filled Boston city street monitored in real-time with intuVision's Panoptes system, tracking persons and objects and detecting events within the scene. Our VideoRecall intelligent video analytics system also on view, illustrated our effective data query solutions and user-friendly report building within the VideoRecall software framework.

Panoptes and VideoRecall systems are deployed in both large and small-scale government and commercial systems. Our clients applaud intuVision's ability to customize security solutions to meet their needs and the high level of quality products they receive.

As a sponsor of this IEEE event, intuVision made clear its commitment to high quality, high tech research and design efforts for deployment within the intelligence community.

intuVision looks forward to launch new products and work together with manufacturers and integrators to develop end-to-end security systems. We are eager to assess your system and offer our products for trial evaluation, either standalone or integrated within existing systems. For more information regarding our services and products, please visit our website at www.intuvisiotech.com or to get in touch by telephone, call us at (781) 497-1015.
