

Panoptes-LITE is here!

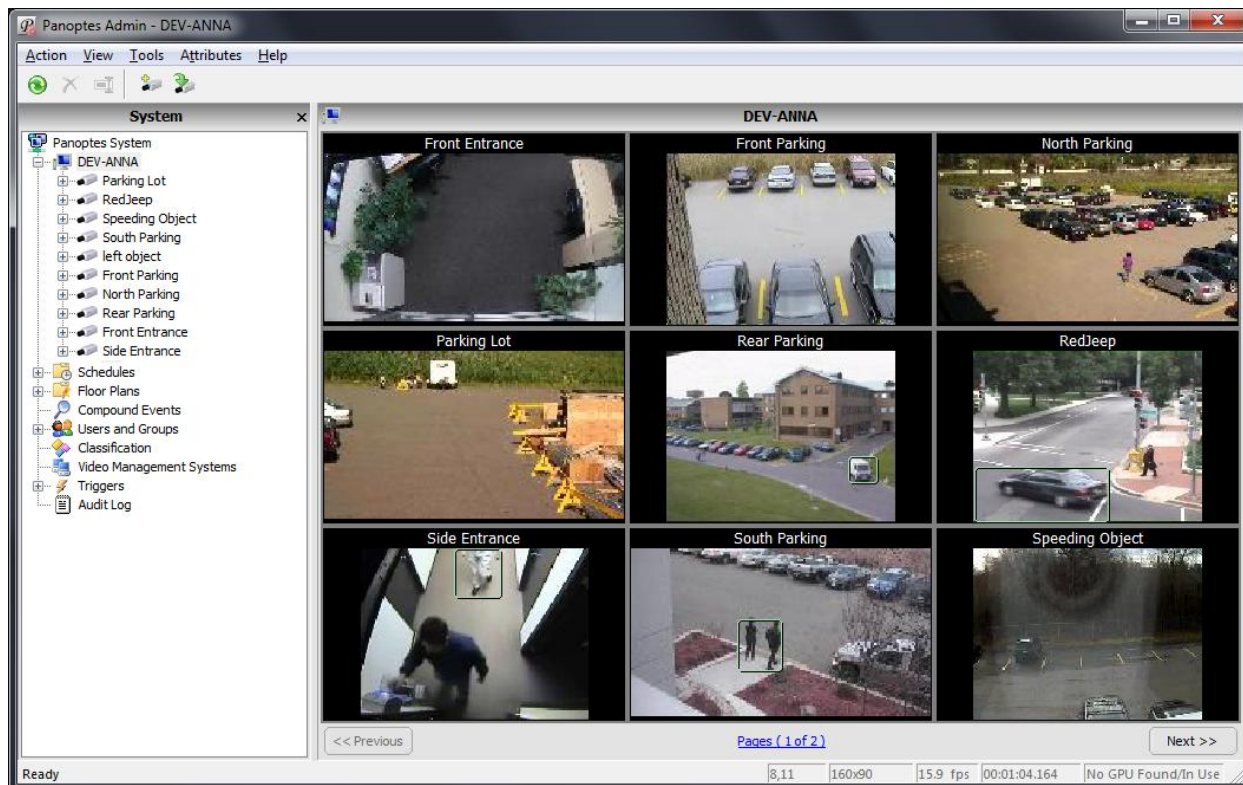

We are pleased to announce the release of the light-weight low-cost alternative for server side analytics everyone has been waiting for.

If your camera views and your analytics requirements are simple you do not want to pay the full price for a prime video analytics, but the ordinary motion detection with too many false alarms does not help. Then Panoptes-LITE is the solution you are looking for!

New Panoptes-LITE offers object detection and tracking accuracy comparable to full feature server based analytics at a fraction of the price and using only a fraction of the computational resources.

Panoptes-LITE offers:

- Activity: Detecting any object activity in a marked zone or the entire scene
- Line Crossing: Detecting any object crossing the line in the user specified direction
- Perimeter Intrusion: Detecting any objects entering the digital perimeter boundary
- Wrong Way: Detecting objects traveling in the wrong direction
- Camera Tampering: Detecting if a camera has been tampered with: covered, blocked, or otherwise interrupted.
