

## **Unveiling Panoptes Version 6.0**

---

We are pleased to introduce Panoptes' latest release, 6.0!

Our Panoptes 6.0 release features new system capabilities such as user groups and system audits, updates to event spies, more robust classification, and more:

- New user groups to customize permissions for each user to further secure the system
- Auditing of commands in the system to review user actions and prevent system tampering
- Accurate PTZ controls to adjust your cameras directly from Panoptes
- Cisco Video Surveillance Manager (VSM) 7.5 Integration complete with object metadata
- Drag and drop cameras from between computers to optimize resource usage in distributed systems
- Better object classification
- Directional Line Crossing with full and partial line cross options to best customize event rules
- Enhanced camera tampering detection
- Resizing video resolution from RTSP based cameras
- Auto mode to view snapshots associated with an event effortlessly in slide show
